

BLUE PRINTS FOR DIY CATAPULT

1. Stack 5 craft sticks on top of each other and secure both ends with a rubber band. This will be your crossbar.
2. Stack 2 craft sticks on top of each other and secure one end with a rubber band.
3. Carefully open up the 2 craft sticks and slide your stack of 5 in between them.
4. Then lay a plastic spoon on top of the top craft stick and secure both ends of the spoon to the craft stick. (As shown in the picture below.)
5. Finally, criss-cross two more rubber bands around the area where the craft sticks intersect, holding it all in place.

How to launch your catapult:

To launch your homemade catapult, simply hold one side of the crossbar while using one finger to push the spoon down and then — let go!

Materials Needed:

Craft Sticks
Plastic Spoon
Small Rubber Bands
